

ABOUT US

KeyW is passionate about the security of our nation and its allies. Our advanced engineering and technology solutions support the collection, processing, analysis and dissemination of information across the full spectrum of the Intelligence, Cyber and Counterterrorism communities' missions.

WHAT WE DO

END-TO-END MISSION SOLUTIONS

OUR SOLUTIONS

Innovative, end-to-end solutions that go beyond the expected.

WHY KeyW?

UNCONVENTIONAL THINKING

Our team comprises brilliant minds that constantly push conventional thinking and approach every challenge with unbridled intellectual curiosity in order to come up with new, innovative solutions that go beyond the expected.

NIMBLE

We fuse an entrepreneurial approach with large-scale capabilities and resources, allowing us to address needs in near real time, stay ahead of ever-changing environments and create innovative solutions for the future.

NATIONAL SECURITY IS THE HEART OF OUR MISSION

Many of our employees are former intelligence community and military leaders that have the experience, passion and know-how to solve the hardest problems in national security.

RELENTLESS

We find the best solution, not just the *first* solution — and we often anticipate the needs of our clients to proactively create solutions for emergent and evolving mission needs.
