AgilePod®
Assured mission readiness.
Improved ISR agility.

OUR SOLUTION

AgilePod® is an open architecture, reconfigurable multi-mission pod for command and control, ISR and global strike operations.

MULTI-MISSION CAPABILITIES
The ability for today’s military to adapt to multiple missions at a moment’s notice is not only critical but often the difference between success and failure. AgilePod® is a multi-mission, open architecture, reconfigurable carbon fiber pod, providing U.S. warfighters with global strike and affordable/operationally flexible airborne Intelligence, Surveillance and Reconnaissance (ISR) capabilities—while offering real solutions to close warfighting gaps.

EXCELLENCE AT WORK
AgilePod® enables U.S. Special Forces, Air Force, Navy and other users to change sensor configurations in less than two hours—compared to years—for currently fielded airborne ISR systems.

Among its many benefits, AgilePod® provides operational flexibility and rapid fielding of new capabilities for manned and unmanned platforms. AgilePod® demonstrates the benefits of agile manufacturing and a modular open systems approach that makes command and control, ISR and global strike missions more affordable.

PROTOTYPE SUCCESS
In 2016, KeyW delivered its first AgilePod® prototype to the Air Force Research Laboratory (AFRL). AgilePod® is scheduled for integration/flight testing on the MQ-9 aircraft in early 2018. The response to AgilePod® has been overwhelmingly positive, and it’s been touted as a “game changer” for ISR.
**KeyW ISR Systems**

KeyW's ISR systems are software-reconfigurable, multi-spectrum sensors that are readily adaptable to diverse missions and a wide range of aircraft and ground vehicles. When coupled with its aircraft services capabilities, KeyW's radar, electro-optical, light detection and ranging and signals intelligence solutions deliver highly advanced, yet affordable ISR products and services for virtually any mission.

**Disclaimer** – AgilePod® was developed and manufactured under contract FA8650-15-C-5519 between KeyW and the Air Force Research Laboratory. **About KeyW**

KeyW is a pure-play national security solutions provider for the Intelligence, Cyber and Counterterrorism Communities’ toughest challenges. We support the collection, processing, analysis and dissemination of information across the full spectrum of the Intelligence Community’s mission. We employ and challenge the most talented professionals in the industry with solving such complex problems as preventing cyber threats, transforming data into Intelligence and combating global terrorism.
